Innovative glass for a better world

Arc, world leader in tableware, has nearly 200 years of experience and expertise in glassware production. Arc has also acquired unique expertise over the years in the areas of food service, bars, gastronomy, and oenology. With its three brands, Arcoroc™, Chef&Sommelier™ and Luminarc™ - by and large distributed on the food service circuit. Arc perfectly meets the needs of hospitality and restaurant professionals via a very extensive portfolio of products.

In this catalogue, discover different unit needs among which you will find the perfect solution for your needs, from the heaviest to the most refined usage, as well as the most innovative.

All the articles produced by the ARC Group are made of glass. Infinitely recyclable, insulating, non-flammable and resistant - glass is by definition a sustainable material.

We sell our products under 3 main brands in India as below

Luminarc

ARCOROC

PRODUCT FEATURES

a tempered glass can be up to 5 times more resistant than an item that has not undergone any specific treatment process.

they can thus be removed from the oven (or from a salamander) and placed directly in cold water without the risk of breakage.

when a shock or series of shocks manage to rupture the exterior shell of the tempered glass, the resulting glass shards are not sharp to the touch

Savings across the entire chain: fewer breakages and chipping during transportation, storage, washing and polishing.

The perfect mastery of its composition, the quality of the sand used, and fusion at a very high temperature gives Krysta™ perfect transparency

After 2,000 professional dishwasher cycles, Krysta™ is as brilliant and transparent as ever.

Krysta™'s exclusive composition gives it a clear, pure sound in keeping with the tone of the finest crystals.

A photograph of two square-shaped glasses on a light-colored kitchen countertop. The glass on the left is filled with a golden-brown liquid, likely whiskey, and contains several large ice cubes. The glass on the right is empty. In the background, a blurred kitchen scene is visible, featuring wooden shelves with various items and a window. To the left of the glasses, there is a small white bowl containing a mix of green and purple grapes. To the right, a small white dish with a yellow substance is partially visible. The lighting is bright and even, highlighting the clarity of the glass and the texture of the ice.

When the wine is agitated,
it rises vertically,
expressing its aromas in
successive layers

Gentle angle allowing
the oxygenation
of young wines

Perfectly continuous
glass profile

Perfectly flat base: stable
and no water retention
after dishwashing

DO'S AND DONT'S OF GLASSWARE

DO'S

Always discard damaged or chipped items

Always carry stem glasses by the upper portion of the bowl, not by the stem or foot

Always remove ice from glassware before cleaning. This allows the items to be nearer room temperature before washing thus avoiding a thermal shock

Always rinse the glasses before placing them in the washing machine

Always hold the stem glass by the stem and not by the foot when wiping

DONT'S

Never carry multiple Items in one hand

A bottle should never make contact with the glass during service

Never leave liquid in the bottom of a glass for prolonged period of time (2 hours maximum).

Never stack items that haven't been designed to do so

Never place cutlery in glasses
